Student Opportunity & Experience Hub

Balanced 8-member structure: 3 stronger technical members + 5 CMIS members

The three technically stronger members handle the shared backend, database, integration and deployment work. The other five members own meaningful user-facing modules with lighter technical complexity.

Member	Type	Component	Main Work	Why It Fits
1	Technical	Authentication, User Accounts & Database	Registration/login, roles, database design, profile data, shared backend setup and security.	Foundation used by all other modules.
2	Technical	Opportunity Management & Admin System	Create/edit/delete opportunities, organisation submissions, approvals, APIs and admin dashboard.	Controls core data and moderation.
3	Technical	Smart Search, Recommendations & Integration	Search/filtering, recommendations, API integration, system testing and deployment support.	Handles advanced logic and final integration.
4	CMIS	Student Profile & Digital Portfolio	Profile UI, education, skills, interests, achievements, certificates, projects and portfolio display.	Strong UI/UX component with lighter backend needs.
5	CMIS	Opportunity Discovery & Details	Browse opportunities, category pages, cards, details, eligibility and navigation.	Main student-facing discovery experience.
6	CMIS	Saved Opportunities & Application Tracker	Save/bookmark, Interested/Applied/Completed status, notes, progress tracking and dashboard views.	Simple but practical workflow component.
7	CMIS	Events, Workshops & Student Calendar	Workshops, conferences, webinars, deadlines, calendar interface, event details and registration links.	Useful feature with manageable technical scope.
8	CMIS	Student Community & Experience Hub	Reviews, tips, success stories, feedback, peer interaction and optional mentor/team-finder interface.	Adds engagement and community value.

Suggested Collaboration

Technical Member 1 supports Student Profile and Community user/account functions. **Technical Member 2** supports Opportunity Discovery and Events with shared opportunity/event data. **Technical Member 3** supports Search, Saved Opportunities, integration and deployment.

Recommended Student Flow

Create Account -> Build Profile -> Discover Opportunities -> Search/Filter -> Save or Apply -> Track Progress -> Attend Events -> Share Experiences
